Student Assistant for Designing Illustrations With BioRender

The Division Data Science in Biomedicine of PLRI is seeking a student assistant for designing illustrations using the BioRender online tool. This comprises mostly figures for lecture slides, but also figures for publications like papers, posters, and talks.

Responsibilities include, but are not limited to:

- Designing illustrations using the BioRender online tool

We expect:

- Reliability
- Ability to work independently
- Availability based on mutual agreement
- Background knowledge in molecular biology is advantageous but not necessary
- Good visual acuity
- Experience in graphics design is advantageous but not necessary
- English language proficiency in both speaking and writing

We offer:

- Flexible working hours by arrangement
- An interdisciplinary, open, and friendly working environment
- If interested and qualified: long-term involvement in research and teaching

The workload can be set at **20 - 40 hours per month**, depending on individual preference.

Applicants with disabilities will be given preferential consideration if equally qualified. Proof of disability must be provided. Personal data will be stored for the purpose of conducting the application process.

If you are interested or have any questions, please contact Gihanna Galindez (**gihanna.galindez@plri.de**) by email (**in case of application, please include a brief curriculum vitae and a letter of motivation**).
